

## HAILEY CANTU

Port Lavaca, TX • hmcantu@outlook.com • [linkedin.com/in/hailey-cantu](https://www.linkedin.com/in/hailey-cantu) • [github.com/hmcantu](https://github.com/hmcantu)

Technical Operations & Automation Engineer | Full-Stack & APIs

## TECHNICAL SKILLS

- **Languages & Core:** JavaScript (ES6+), TypeScript, React, HTML5, CSS3, REST APIs, SQL, Python
- **Frameworks & Libraries:** Node.js, Express.js, Tailwind CSS, MongoDB
- **Developer Tools:** Git, GitHub, Postman, Chrome Developer Tools, Jest, Jira, Log Analysis
- **Engineering Capabilities:** UI Component Architecture, Web Application Development, API Integration, Production Debugging, Root Cause Analysis

## PROFESSIONAL EXPERIENCE

### WORKTANGO INC.

**Technical Support Lead & Engineering Contributor** (*Apr 2022 – Present*)

- **Enterprise Escalations & Root-Cause Diagnostics:** Owned and resolved complex platform and data-sync escalations for enterprise accounts; partnered directly with Product and CX Engineering in daily hotfix SWAT sessions to isolate root causes, reproduce defects in staging environments, and validate code fixes prior to deployment.
- **API Payload & Schema Analysis:** Debugged API formatting, payload structures, schema mismatches, and webhooks across enterprise HRIS integrations (ADP, BambooHR); analyzed server logs, database records, and network traces using Postman and browser DevTools to resolve critical data-sync failures.
- **Custom Engineering Tooling & Automation:** Designed and built a custom **Bug Capture Chrome Extension** using JavaScript and DOM APIs that automatically captured network pathways and application state to streamline Jira ticket generation; integrated AI-driven triage pipelines into Zendesk to accelerate incident classification.
- **Incident Management & Platform Telemetry:** Managed technical support operations during high-severity platform incidents and outages; led real-time customer communications for enterprise stakeholders while capturing system telemetry and diagnostic data for R&D post-mortems.
- **Cross-Functional Specifications & Requirements:** Translated recurring platform edge cases, customer feedback, and complex system behaviors into actionable technical specifications, user stories, and Jira tickets for R&D engineering teams.
- **Team Coaching & Runbook Enablement:** Authored comprehensive internal runbooks, troubleshooting workflows, and API integration guides; mentored team members on complex diagnostic techniques to elevate first-contact resolution metrics across the support organization.

## **PRIOR OPERATIONAL & TEAM LEADERSHIP ROLES** (2010 – 2022)

**General Manager / Department Manager** — *McDonald's, Teleperformance, Benefit Harbor*

- Directed cross-functional team scheduling, operational workflows, and data analytics across high-volume environments.

## **TECHNICAL & ENGINEERING PROJECTS**

**Mesh AI — Full-Stack Web Application** | [github.com/hmcantu/ai-se\\_project\\_mesh-ai](https://github.com/hmcantu/ai-se_project_mesh-ai)

- Engineered an AI-powered web app using JavaScript, React, and Node.js to automate data processing and streamline user workflows.
- Integrated third-party REST APIs and backend asynchronous logic to handle complex, real-time data payloads reliably.
- Built responsive UI components with clean architecture, prioritizing intuitive navigation and UX performance.

**TripleTen Engineering Projects** | [github.com/hmcantu](https://github.com/hmcantu)

- Developed full-stack web applications from architectural design to deployment using React, Express, Node.js, and SQL/MongoDB.
- Implemented secure user authentication via JSON Web Tokens (JWT) and constructed RESTful API routes handling full CRUD operations.
- Managed version control and continuous deployment using Git/GitHub feature branching and pull request reviews.

## **EDUCATION & CERTIFICATIONS**

- **Software Engineering Certificate** — TripleTen Software Engineering Bootcamp (*Expected Sept 2026*)
- **Associate of Arts (AA)** — Coastal Bend College
